Sprint 3 Materials

CSCE 331 Warriors

Mohammad Shohaib
Jose Rojo
Maxwell Xie
Cole Mottin
Christopher Liu
Carlos Moreno

Retrospective Summary

In this retrospective meeting we looked back and discussed how sprint 3 went. Sprint 3 was mostly focused on adding API integration along with accessibility features and any other tasks that were not finished by the end of sprint 2. In this meeting we discussed how after sprint 1 we decided we needed to put in a lot more work into sprint 2 because we realized at the pace of sprint 1 we weren't going to be able to finish in time. In sprint 2 we were very ambitious and tried to do significantly more work, but fell short on a couple of tasks. Sprint 3 seemed to be more of a happy middle ground as we still put in a lot of work, but were able to finish all of our tasks. This has led us to have a finished project by the end of sprint 3 that we were all happy about. If we were to have another project or additional sprint on this project, we would probably try to replicate the procedure we had for Sprint 3, as it was very efficient and led to our best work. The only thing that really could be considered to have gone wrong were we were missing a couple of features that our TA suggested we should implement in our sprint 3 demo, such as a screen for viewing the current status of different orders.

Product Backlog

(1 point = 4 hours)

1. As a cashier/manager, I want the database to be set up so that my actions will be reflected somewhere.
   a. Priority: high
   b. Dependencies: none
   c. User story points: 1
   d. Status: complete

2. As a manager, I want to have a GUI so that I can interact with the system.
   a. Priority: high
   b. Dependencies: none
   c. User story points: 2
   d. Status: complete

3. As a cashier, I want to have a GUI so that I can interact with the system.
   a. Priority: High
   b. Dependencies: None
   c. User story points: 2
   d. Status: complete

4. As a customer, I want to have a self-service GUI so that I can order in a contactless way.
   a. Priority: high
   b. Dependencies: none
   c. User story points: 2
   d. Status: complete

5. As a customer, I want to be able to view all items together on a big menu so that I don't miss any items that I would want.
   a. Priority: high
   b. Dependencies: none
   c. User story points: 2
   d. Status: complete

6. As the manager, I want to be able to run this application through a browser interface so that I will have an easier time running the application and it will be more accessible.
   a. Priority: high
   b. Dependencies: none
   c. User story points: 1
   d. Status: complete

7. Sprint 1 testing: All GUI elements
   a. Priority: high
   b. Dependencies: GUI
   c. User story points: 1
   d. Status: complete

8. As a manager, I want to be able to view sales analytics so that I can make decisions based on that information.
   a. Priority: medium
   b. Dependencies: Manager GUI, database
   c. User story points: 1
   d. Status: Complete

9. As a manager, I want the sales analytics to be shown in graphs or charts where applicable so that I can have a visual representation of the data.
   a. Priority: medium
   b. Dependencies: Manager GUI, database, sales analytics functionality
   c. User story points: 1
   d. Status: Complete

10. As a manager, I want to be able to update the inventory so that I can keep the database up-to-date with restocks.
    a. Priority: medium
    b. Dependencies: Manager GUI, database
    c. User story points: 1
    d. Status: Complete

11. As a manager, I want to be able to add items to the inventory so that I can track new inventory items.
    a. Priority: medium
    b. Dependencies: Manager GUI, database
    c. User story points: 1
    d. Status: Complete

12. As a manager,I want to be able to remove items from the inventory so that I can remove ingredients that are no longer used.
    a. Priority: medium
    b. Dependencies: Manager GUI, database
    c. User story points: 1
    d. Status: Complete

13. As a manager, I want to be able to add items to the menu so that I can add limited/new items.
    a. Priority: medium
    b. Dependencies: Manager GUI, database
    c. User story points: 1
    d. Status: Complete

14. As a manager, I want to be able to remove items from the menu so that I can remove items that are out of stock/season.
    a. Priority: medium
    b. Dependencies: Manager GUI, database
    c. User story points: 1
    d. Status: Complete

15. As a manager, I want to be able to update the prices of items so that I can keep the database up-to-date with any price changes.
    a. Priority: medium
    b. Dependencies: Manager GUI, database
    c. User story points: 1
    d. Status: Complete

16. As a manager, I want to be able to view all menu items together and all inventory items together so that I can see all of each category in one place.
    a. Priority: medium
    b. Dependencies: Manager GUI, database
    c. User story points: 1
    d. Status: Complete

17. As a manager, I want to be able to know the current weather conditions so that I can make predictions on how busy the restaurant will be.
    a. Priority: medium
    b. Dependencies: Manager GUI
    c. User story points: 1
    d. Status: complete

18. As a cashier, I want to be able to add items to an order so that I can accommodate what the customer wants.
    a. Priority: medium
    b. Dependencies: Cashier GUI
    c. User story points: 1
    d. Status: Complete

19. As a cashier, I want to be able to remove items from an order so that the customer can change their mind, or so that I can fix a mistake.
    a. Priority: medium
    b. Dependencies: Cashier GUI
    c. User story points: 1
    d. Status: Complete

20. As a cashier, I want to be able to clear an entire order so that I do not have to manually remove each item if a customer decides to leave.
    a. Priority: medium
    b. Dependencies: Cashier GUI

  c. User story points: 1

  d. Status: Complete

21. As a cashier, I want to be able to proceed the customer to checkout so that we can complete the order.

  a. Priority: medium

  b. Dependencies: Cashier GUI, database

  c. User story points: 1

  d. Status: In progress

22. As a cashier, I want to be able to know which items are out of stock so that these items are not sold.

  a. Priority: medium

  b. Dependencies: Cashier GUI, database

  c. User story points: 1

  d. Status: In progress

23. As a cashier, I want to be able to know the price of the order so that I can inform the customer of the price.

  a. Priority: medium

  b. Dependencies: Cashier GUI, database

  c. User story points: 1

  d. Status: Complete

24. As a cashier, I want to be able to view the cart so that I can verify the order with the customer before checking out.

  a. Priority: medium

  b. Dependencies: Cashier GUI

  c. User story points: 1

  d. Status: Complete

25. As a customer, I want to be able to add items to an order so that I can build my order.

  a. Priority: medium

  b. Dependencies: Self-serve GUI

  c. User story points: 1

  d. Status: Complete

26. As a customer, I want to be able to remove items from an order so that I can get rid of an item I changed my mind on or accidentally added.

  a. Priority: medium

  b. Dependencies: Self-serve GUI

  c. User story points: 1

  d. Status: Complete

27. As a customer, I want to be able to clear an entire order so that I do not have to manually remove each item if I want to leave.

  a. Priority: medium

b. Dependencies: Self-serve GUI

c. User story points: 1

d. Status: Complete

28. As a customer, I want to be able to check out so that I can pay for my food and complete the order.

   a. Priority: medium

   b. Dependencies: Self-serve GUI, database

   c. User story points: 1

   d. Status: In progress

29. As a customer, I want to be able to know which items are out of stock so that I don't accidentally order something that can't be made.

   a. Priority: medium

   b. Dependencies: Self-serve GUI, database

   c. User story points: 1

   d. Status: In progress

30. As a customer, I want to know the price of my order so that I can verify whether or not I'm able to make this purchase and whether or not I would like to.

   a. Priority: medium

   b. Dependencies: Self-serve GUI, database

   c. User story points: 1

   d. Status: Complete

31. As a customer, I want to be able to view the cart so that I can verify the entire order before checking out.

   a. Priority: medium

   b. Dependencies: Self-serve GUI

   c. User story points: 1

   d. Status: Complete

32. As a customer, I want the menu to incorporate the weather so that the ambience of the restaurant reflects the weather.

   a. Priority: medium

   b. Dependencies: Menu screen

   c. User story points: 1

   d. Status: complete

33. As a customer, I want to see the calorie count of each item so that I can make health-conscious decisions.

   a. Priority: medium

   b. Dependencies: Menu screen, database

   c. User story points: 1

   d. Status: complete

34. As a customer, I want to know which items are popular so that I can order something that others seem to enjoy.
    a. Priority: medium
    b. Dependencies: Menu screen, database
    c. User story points: 1
    d. Status: complete

35. As a manager, I want the menu to be adjustable so that it will reflect changes we make in the system.
    a. Priority: medium
    b. Dependencies: Menu screen, database
    c. User story points: 1
    d. Status: complete

36. As a person with vision impairment, I want to be able to enlarge the text to a comfortable size so that I can easily read what's on the screen.
    a. Priority: medium
    b. Dependencies: none
    c. User story points: 1
    d. Status: complete

37. As a person with vision impairment, I want the contrast to allow me to distinguish between text and background so that I can easily read what's on the screen.
    a. Priority: medium
    b. Dependencies: none
    c. User story points: 1
    d. Status: complete

38. As a person who is illiterate, I want to be able to have the text read out to me so that I do not have to read.
    a. Priority: medium
    b. Dependencies: none
    c. User story points: 1
    d. Status: complete

39. As a person with motor impairment, I want the navigation to be simple and have large buttons so that I can use the application efficiently and effectively.
    a. Priority: medium
    b. Dependencies: none
    c. User story points: 1
    d. Status: complete

40. As a person with motor impairment, I want to be able to navigate the application using only a keyboard so that I can avoid using a mouse/touch.
    a. Priority: medium
    b. Dependencies: none

  c. User story points: 1

  d. Status: complete

41. As a person who speaks English as my second language, I want to change the text to my first language so that I understand what all the buttons do.

  a. Priority: medium

  b. Dependencies: none

  c. User story points: 1

  d. Status: complete

42. As a person with celiac disease, I want to know which items have gluten so I can avoid them and not have a reaction.

  a. Priority: medium

  b. Dependencies: database

  c. User story points: 1

  d. Status: complete

43. As a person with celiac disease, I want to make adjustments to order so that I can enjoy gluten-free foods.

  a. Priority: medium

  b. Dependencies: none

  c. User story points: 1

  d. Status: complete

44. As a person who does not consume animal products, I want to know which items are vegan-friendly so that I can still enjoy the vegan options.

  a. Priority: medium

  b. Dependencies: database

  c. User story points: 1

  d. Status: complete

45. As a person who has a nut allergy, I want to know which items may cause an allergic reaction so that I can avoid those items.

  a. Priority: medium

  b. Dependencies: database

  c. User story points: 1

  d. Status: complete

46. As a person with red-green color blindness, I want to be able to change the colors to be red-green friendly so that I can view the application comfortably.

  a. Priority: medium

  b. Dependencies: none

  c. User story points: 1

  d. Status: complete

47. As a customer, I want to be able to see recommendations based on the weather so that I can get a suggestion that might be better suited.

a. Priority: low
b. Dependencies: none
c. User story points: 1
d. Status: complete

48. As a customer, I want the menu to be well-organized so that I can easily find items in their categories.
    a. Priority: medium
    b. Dependencies: Menu
    c. User story points: 1
    d. Status: complete

49. As a manager, I want the manager's side buttons to be well-organized and easily navigable so that I can quickly find what I need.
    a. Priority: medium
    b. Dependencies: Manager GUI
    c. User story points: 1
    d. Status: complete

50. As a manager, I want to be able to download the results of analytics so that I can save them and compare them to others.
    a. Priority: medium
    b. Dependencies: Manager GUI
    c. User story points: 1
    d. Status: complete

51. As a cashier, I want the ordering buttons to be well-organized and intuitive so that I can easily learn the system and find items.
    a. Priority: medium
    b. Dependencies: Cashier GUI
    c. User story points: 1
    d. Status: complete

52. As a customer, I want the self-service ordering buttons to be well-organized and intuitive so that I can easily find the right items and place my own order.
    a. Priority: medium
    b. Dependencies: Self-serve GUI
    c. User story points: 1
    d. Status: complete

53. As a user, I want to be able to log in to the correct account so that I have access to the correct features.
    a. Priority: high
    b. Dependencies: GUI
    c. User story points: 2
    d. Status: Complete

54. As a manager, I want to be able to navigate to different pages in the app so that I can easily access all the different functionalities of the app.
    a. Priority: medium
    b. Dependencies: GUI
    c. User story points: 1
    d. Status: In progress
55. Sprint 2 testing: Manager functionality
    a. Priority: high
    b. Dependencies: Manager functionality
    c. User story points: 1
    d. Status: complete
56. Sprint 2 testing: Cashier checkout functionality
    a. Priority: high
    b. Dependencies: Cashier checkout functionality
    c. User story points: 1
    d. Status: complete
57. Sprint 2 testing: Self-serve checkout functionality
    a. Priority: high
    b. Dependencies: Self-serve checkout functionality
    c. User story points: 1
    d. Status: complete

Sprint Backlog

(1 point = 4 hours)

1. As a manager, I want to be able to know the current weather conditions so that I can make predictions on how busy the restaurant will be.
    a. User story point value: 1
    b. Assigned to: Cole Mottin
    c. Actual time spent: 4 hours
    d. Status: completed
2. As a cashier, I want to be able to proceed the customer to checkout so that we can complete the order.
    a. User story point value: 1
    b. Assigned to: Jose Rojo
    c. Actual time spent: 4 hours
    d. Status: completed

3. As a cashier, I want to be able to know which items are out of stock so that these items are not sold.
   a. User story point value: 1
   b. Assigned to: Maxwell Xie
   c. Actual time spent: 4 hours
   d. Status: completed

4. As a customer, I want to be able to check out so that I can pay for my food and complete the order.
   a. User story point value: 1
   b. Assigned to: Jose Rojo
   c. Actual time spent: 4 hours
   d. Status: completed

5. As a customer, I want to be able to know which items are out of stock so that I don't accidentally order something that can't be made.
   a. User story point value: 1
   b. Assigned to: Maxwell Xie
   c. Actual time spent: 4 hours
   d. Status: completed

6. As a customer, I want the menu to incorporate the weather so that the ambience of the restaurant reflects the weather.
   a. User story point value: 1
   b. Assigned to: Cole Mottin
   c. Actual time spent: 4 hours
   d. Status: completed

7. As a customer, I want to see the calorie count of each item so that I can make health-conscious decisions.
   a. User story point value: 1
   b. Assigned to: Cole Mottin
   c. Actual time spent: 4 hours
   d. Status: completed

8. As a customer, I want to know which items are popular so that I can order something that others seem to enjoy.
   a. User story point value: 1
   b. Assigned to: Maxwell Xie
   c. Actual time spent: 4 hours
   d. Status: completed

9. As a manager, I want the menu to be adjustable so that it will reflect changes we make in the system.
   a. User story point value: 1
   b. Assigned to: Cole Mottin

    c. Actual time spent: 4 hours

    d. Status: completed

10. As a person with vision impairment, I want to be able to enlarge the text to a comfortable size so that I can easily read what's on the screen.

    a. User story point value: 1

    b. Assigned to: Mohammad Shohaib

    c. Actual time spent: 4 hours

    d. Status: completed

11. As a person with vision impairment, I want the contrast to allow me to distinguish between text and background so that I can easily read what's on the screen.

    a. User story point value: 1

    b. Assigned to: Mohammad Shohaib

    c. Actual time spent: 4 hours

    d. Status: completed

12. As a person who is illiterate, I want to be able to have the text read out to me so that I do not have to read.

    a. User story point value: 1

    b. Assigned to: Christopher Liu

    c. Actual time spent: 4 hours

    d. Status: completed

    e. Actual time spent: 0 hours

    f. Status: In progress

13. As a person with motor impairment, I want the navigation to be simple and have large buttons so that I can use the application efficiently and effectively.

    a. User story point value: 1

    b. Assigned to: Mohammad Shohaib

    c. Actual time spent: 4 hours

    d. Status: completed

14. As a person with motor impairment, I want to be able to navigate the application using only a keyboard so that I can avoid using a mouse/touch.

    a. User story point value: 1

    b. Assigned to: Mohammad Shohaib

    c. Actual time spent: 4 hours

    d. Status: completed

15. As a person who speaks English as my second language, I want to change the text to my first language so that I understand what all the buttons do.

    a. User story point value: 1

    b. Assigned to: Christopher Liu

    c. Actual time spent: 4 hours

    d. Status: completed

16. As a person with celiac disease, I want to know which items have gluten so I can avoid them and not have a reaction.
    a. User story point value: 1
    b. Assigned to: Maxwell Xie
    c. Actual time spent: 4 hours
    d. Status: completed

17. As a person who does not consume animal products, I want to know which items are vegan-friendly so that I can still enjoy the vegan options.
    a. User story point value: 1
    b. Assigned to: Maxwell Xie
    c. Actual time spent: 4 hours
    d. Status: completed

18. As a person who has a nut allergy, I want to know which items may cause an allergic reaction so that I can avoid those items.
    a. User story point value: 1
    b. Assigned to: Maxwell Xie
    c. Actual time spent: 4 hours
    d. Status: completed

19. As a person with red-green color blindness, I want to be able to change the colors to be red-green friendly so that I can view the application comfortably.
    a. User story point value: 1
    b. Assigned to: Mohammad Shohaib
    c. Actual time spent: 4 hours
    d. Status: completed

20. As a customer, I want to be able to see recommendations based on the weather so that I can get a suggestion that might be better suited.
    a. User story point value: 1
    b. Assigned to: Cole Mottin
    c. Actual time spent: 4 hours
    d. Status: completed

21. As a customer, I want the menu to be well-organized so that I can easily find items in their categories.
    a. User story point value: 1
    b. Assigned to: Mohammad Shohaib
    c. Actual time spent: 4 hours
    d. Status: completed

22. As a manager, I want the manager's side buttons to be well-organized and easily navigable so that I can quickly find what I need.
    a. User story point value: 1
   b. Assigned to: Mohammad Shohaib

    c.   Actual time spent: 4 hours

    d.   Status: completed

23. As a manager, I want to be able to download the results of analytics so that I can save them and compare them to others.

    a.   User story point value: 1

    b.   Assigned to: Carlos Moreno

    c.   Actual time spent: 4 hours

    d.   Status: completed

24. As a cashier, I want the ordering buttons to be well-organized and intuitive so that I can easily learn the system and find items.

    a.   User story point value: 1

    b.   Assigned to: Mohammad Shohaib

    c.   Actual time spent: 4 hours

    d.   Status: completed

25. As a customer, I want the self-service ordering buttons to be well-organized and intuitive so that I can easily find the right items and place my own order.

    a.   User story point value: 1

    b.   Assigned to: Mohammad Shohaib

    c.   Actual time spent: 4 hours

    d.   Status: completed

26. As a manager, I want to be able to navigate to different pages in the app so that I can easily access all the different functionalities of the app.

    a.   User story point value: 1

    b.   Assigned to: Mohammad Shohaib

    c.   Actual time spent: 4 hours

    d.   Status: completed

27. As a manager, I want to be able to view, update, and delete orders so that I can correct any mistakes.

    a.   User story point value: 3

    b.   Assigned to: Maxwell Xie

    c.   Actual time spent: 12 hours

    d.   Status: completed

28. As a cashier, I want to be able to view orders so that I can look over past orders when needed.

    a.   User story point value: 1

    b.   Assigned to: Maxwell Xie

    c.   Actual time spent: 4 hours

    d.   Status: completed

29. As an administrator, I want to be able to add, view, update, and delete users so that I can manage who has access to what in the POS.
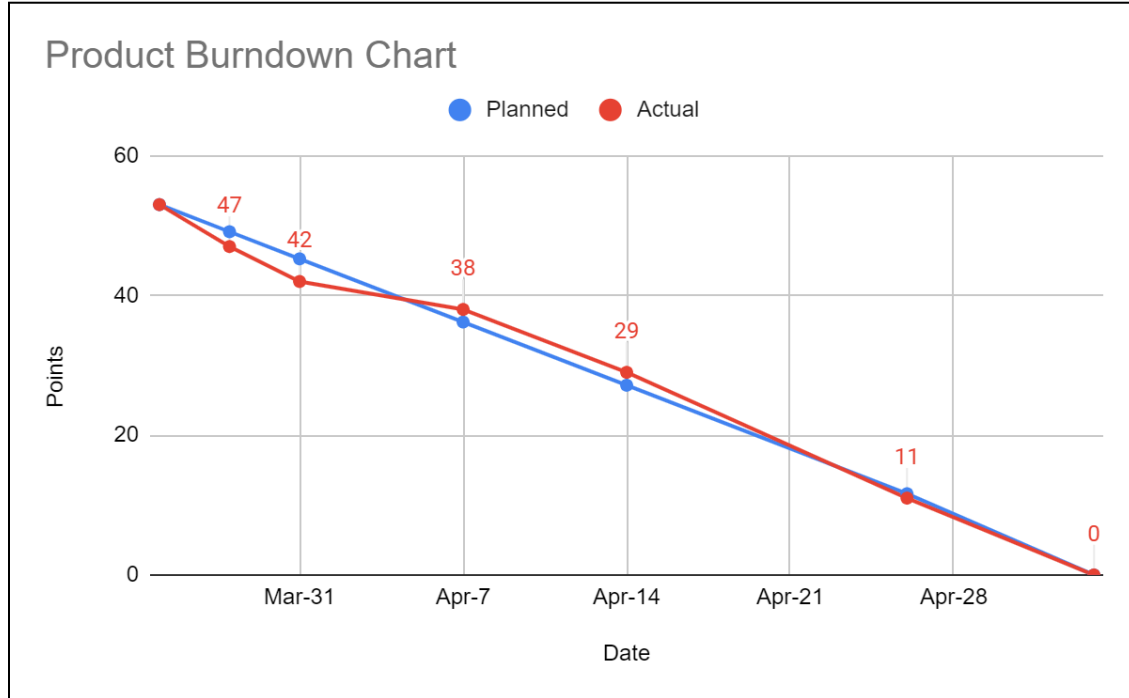

a. User story point value: 4
b. Assigned to: Jose Rojo
c. Actual time spent: 16 hours
d. Status: completed

SCRUM Meeting 1 for Project 3 Sprint 2
Prepared by: Shohaib Mohammad
Meeting Date: 4/17/2024

Meeting Attendees

1. Shohaib Mohammad
2. Jose Rojo
3. Carlos Moreno
4. Maxwell Xie
5. Christopher Liu
6. Cole Mottin

Meeting Agenda Items

- Discuss tasks to work on for the sprint
- Discuss any potential blockers

Status Update Since Last Meeting

Accomplishments:
- Worked on API integration of google authentication

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
As a person who speaks English as my second language, I want to change the text to my first language so that I understand what all the buttons do.	Christopher	yes
As a cashier, I want to be able to view orders so that I can look over past orders when needed.	Maxwell	yes
As a customer, I want to be able to see recommendations based on the weather so that I can get a suggestion that might be better suited.	Cole	no

Before The Next Meeting

Plans:
- Work on finishing API integration

Task Assignments:

Task Description	Assigned to
As a person who has a nut allergy, I want to know which items may cause an allergic reaction so that I can avoid those items.	Maxwell
As a cashier, I want to be able to view orders so that I can look over past orders when needed.	Maxwell
As a person with celiac disease, I want to know which items have gluten so I can avoid them and not have a reaction.	Maxwell
As an administrator, I want to be able to add, view, update, and delete users so that I can manage who has access to what in the POS.	Jose

As a manager, I want to be able to download the results of analytics so that I can save them and compare them to others.	Carlos
As a customer, I want to be able to see recommendations based on the weather so that I can get a suggestion that might be better suited.	Cole
As a person with red-green color blindness, I want to be able to change the colors to be red-green friendly so that I can view the application comfortably.	Shohaib

As a person who does not consume animal products, I want to know which items are vegan-friendly so that I can still enjoy the vegan options.	Maxwell
As a person who speaks English as my second language, I want to change the text to my first language so that I understand what all the buttons do.	Christopher
As a person with vision impairment, I want to be able to enlarge the text to a comfortable size so that I can easily read what's on the screen.	Shohaib
As an administrator, I want to be able to add, view, update, and delete users so that I can manage who has access to what in the POS.	Jose

Minutes from Previous Meeting

From the previous meeting, we discussed the assignments of tasks to everyone in this sprint. We talked about the difficulty of each task, and assigned tasks based on the abilities of all team members. We made sure that task distribution was fair, and that everyone has the ability to complete tasks on time.

SCRUM Meeting 2 for Project 3 Sprint 2

Prepared by: Shohaib Mohammad

Meeting Date: 4/19/2024

Meeting Attendees

7. Shohaib Mohammad
8. Jose Rojo
9. Carlos Moreno
10. Maxwell Xie
11. Christopher Liu
12. Cole Mottin

Meeting Agenda Items

- Discuss tasks to work on for the sprint
- Discuss any potential blockers

Status Update Since Last Meeting

Accomplishments:
- Finished admin page
- Visuals have been overhauled
- Accessibility features added

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
As a person with red-green color blindness, I want to be able to change the colors to be red-green friendly so that I can view the application comfortably.	Shohaib	yes
As a person with vision impairment, I want to be able to enlarge the text to a comfortable size so that I can easily read what's on the screen.	Shohaib	yes

As a customer, I want to be able to see recommendations based on the weather so that I can get a suggestion that might be better suited.	Cole	yes
As a manager, I want to be able to download the results of analytics so that I can save them and compare them to others.	Carlos	yes

Before The Next Meeting

Plans:
- Finish ability to view orders in manager page
- Allow users to see dietary restriction markers

Task Assignments:

Task Description	Assigned to
As a person who has a nut allergy, I want to know which items may cause an allergic reaction so that I can avoid those items.	Maxwell
As a cashier, I want to be able to view orders so that I can look over past orders when needed.	Maxwell
As a person with celiac disease, I want to know which items have gluten so I can avoid them and not have a reaction.	Maxwell
As an administrator, I want to be able to add, view, update, and delete users so that I can manage who has access to what in the POS.	Jose
As a manager, I want to be able to download the results of analytics so that I can save them and compare them to others.	Carlos
As a customer, I want to be able to see recommendations based on the weather so that I can get a suggestion that might be better suited.	Cole
As a person with red-green color blindness, I want to be able to change the colors to be red-green friendly so that I can view the application comfortably.	Shohaib
As a person who has a nut allergy, I want to know which items may cause an allergic reaction so that I can avoid those items.	Maxwell

As a person who does not consume animal products, I want to know which items are vegan-friendly so that I can still enjoy the vegan options.	Maxwell
As a person who speaks English as my second language, I want to change the text to my first language so that I understand what all the buttons do.	Christopher
As a person with vision impairment, I want to be able to enlarge the text to a comfortable size so that I can easily read what's on the screen.	Shohaib
As an administrator, I want to be able to add, view, update, and delete users so that I can manage who has access to what in the POS.	Jose

Minutes from Previous Meeting

From the previous meeting, we discussed what tasks we should prioritize for the coming sprint. We talked about the difficulty of each task, and assigned tasks based on the abilities of all team members. We made sure that task distribution was fair, and that everyone has the ability to complete tasks on time. We also talked about how difficult it might be to integrate the API's into our project.

SCRUM Meeting 3 for Project 3 Sprint 2
Prepared by: Shohaib Mohammad
Meeting Date: 4/25/2024

Meeting Attendees

13. Shohaib Mohammad
14. Jose Rojo
15. Carlos Moreno
16. Maxwell Xie
17. Christopher Liu
18. Cole Mottin

Meeting Agenda Items

- Discuss tasks to work on for the sprint
- Discuss any potential blockers

Status Update Since Last Meeting

Accomplishments:
- Finished accessibility features
- Finished admin page features

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
As an administrator, I want to be able to add, view, update, and delete users so that I can manage who has access to what in the POS.	Jose	yes

Minutes from Previous Meeting

From the previous meeting, we discussed how the project went, and what we still need to tweak before the last demo. We talked about the difficulty of each task, and assigned tasks based on the abilities of all team members. We made sure that task distribution was fair, and that everyone has the ability to complete tasks on time.
